The background features a series of overlapping, semi-transparent blue rectangles that create a sense of depth and movement. These rectangles are arranged in a way that suggests a staircase or a series of steps leading upwards. Additionally, there are diagonal lines and gradients of blue that sweep across the lower portion of the image, adding to the dynamic and modern aesthetic.

At Borin, we turn company
needs into reality, creating
custom solutions that allow
them to work peacefully.

Work Peacefully.

A promise that contains the commitment to study and provide custom solutions to meet each unique need, taking care of company hygiene at 360 degrees.

We understand that hygiene stands as an absolute priority, and we are fully prepared to take on this responsibility with utmost seriousness. We pay attention to the smallest details because we believe that even the tiniest element can lead to substantial improvements. We carefully observe our consumer's requirements and their use of our products, actively embracing suggestions and cues that enable us to enhance the practicality, utility, and simplicity of our service.

Our goal is to take care of everything so that our customers can focus on their work without any worries.

Borin Group

Borin S.r.l. was established in 1987 by its current President, Fausto Borin, whose extensive technical-commercial experience in the washing and sanitizing sector led to the creation of a company dedicated to enhancing and simplifying its customers' work.

Initially, the company was primarily involved in trading cleaning machinery. Subsequently, with the involvement of Fausto Borin's sons, it transitioned into the design and production of cutting-edge systems within the industrial hygiene field.

Between 2017 and 2020, the group invested in studying and researching new technologies, leading to the establishment of new companies - Borin Solutions, Borin Line, B-Tech, and B.S.S. This marked the comprehensive expansion of the Group's presence into the food, cosmetic, and pharmaceutical industries. Today, Borin stands as a recognized national market leader.

The Group, as it exists today, is the outcome of a collaborative family effort and the integration of four specialized companies, all dedicated to delivering a 360° service to its valued customers.

COMMERCIAL ▼

Providing companies across the country with top-tier solutions for cleaning and sanitizing environments, individuals, and equipment, along with a comprehensive design service for departmental technical furnishings.

PRODUCTION ▲

Engaged in the technological research, design, and construction of industrial hygiene plants, machinery, and equipment. It responds to the demands of the international market.

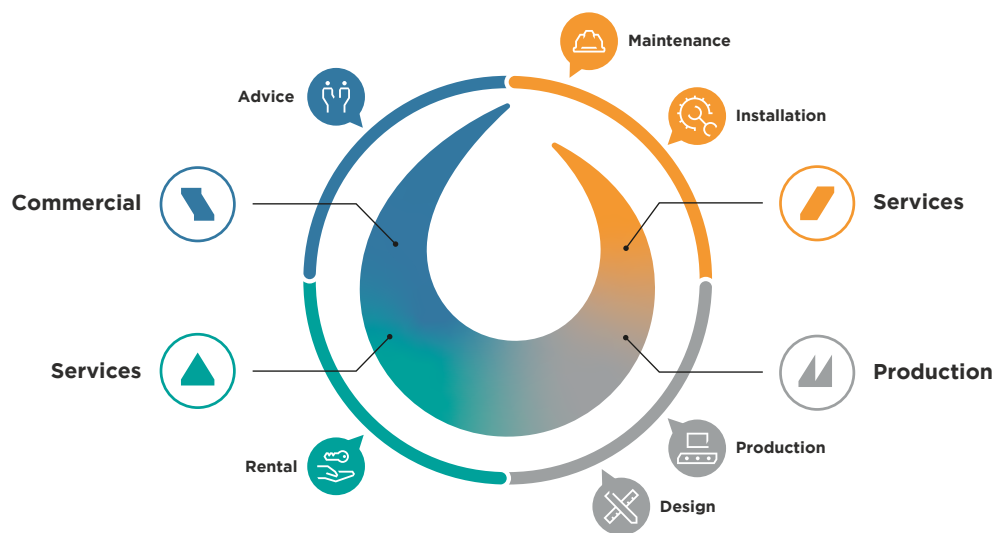

SERVICES ▸

Specializing in the installation and maintenance of systems offered by the Borin Group.

SERVICES ▲

Offering and managing long-term rentals of plants, machinery, and equipment for the cleaning and sanitization of companies.

The Borin Group's unwavering passion, anchored in the principles of integrity, honesty, and transparency, translates into comprehensive customer support. We guide our customers through a thorough problem analysis and craft the most fitting solutions for them.

This is the essence of our motto: "**Work peacefully**, we'll handle the rest."

For every environment we provide the best solution

1 FILTER AREAS

Devices designed to maintain a high standard of hygiene and safety at production area entrances. They oversee the adherence to preventive measures like hand and shoe sole washing and disinfection, in addition to ensuring the use of appropriate attire. These solutions are pivotal in preventing product contamination and upholding a hygienic working environment.

2 WASHING SYSTEMS

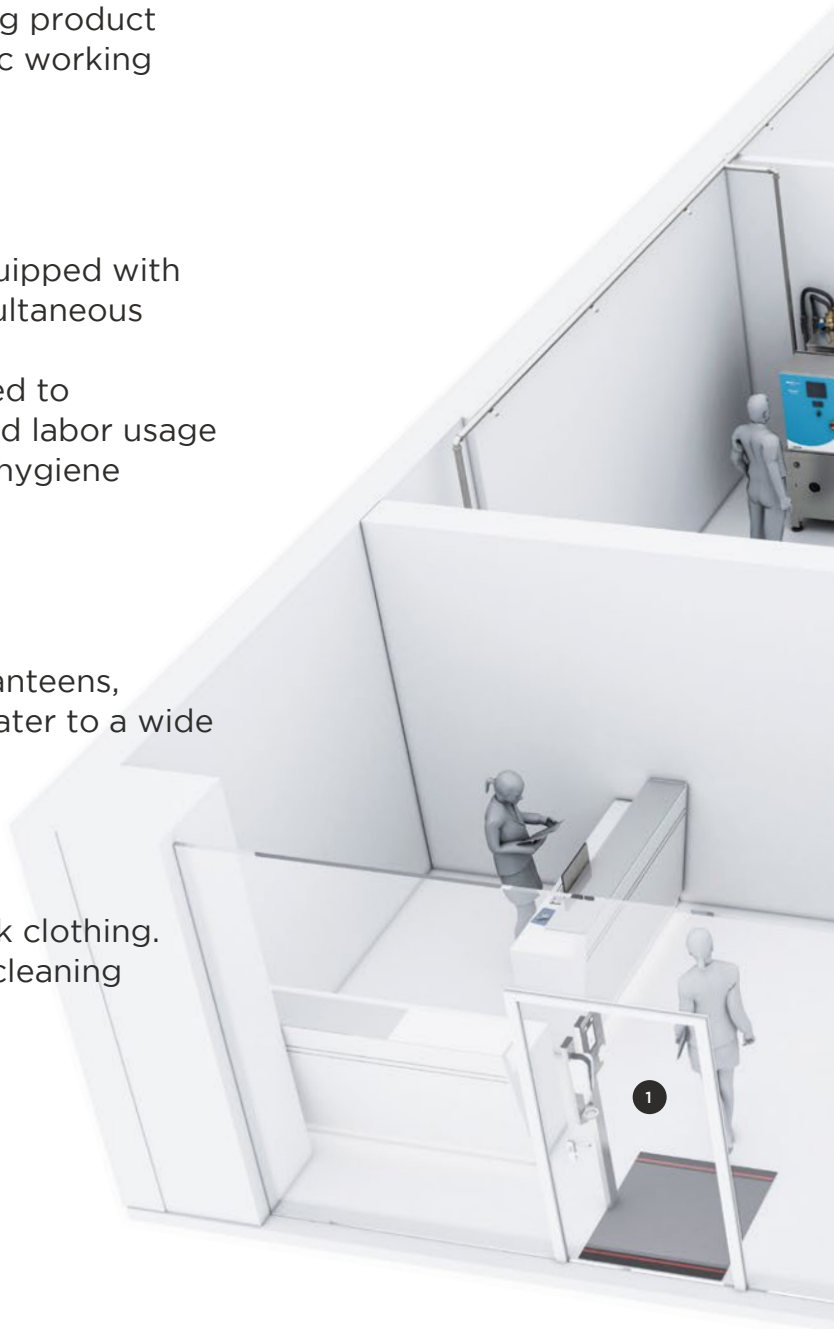

Centralized multi-pressure systems, equipped with accompanying accessories, enable simultaneous washing by multiple operators. These systems are thoughtfully designed to substantially diminish energy, water, and labor usage while ensuring top-notch cleaning and hygiene quality.

3 PREMISES FURNISHING

Furnishing accessories for setting up canteens, changing rooms, and bathrooms that cater to a wide range of functional requirements.

4 SANITIZATION AND CLEANING

Cleaning equipment, products and work clothing. Everything necessary to complete the cleaning service.

Work
Peacefully

BORIN DEMOTRUCK

BORIN DEMOTRUCK©

Two conventional trucks have been transformed into demonstration vehicles, housing over 50 products. These vehicles effectively convert into mobile showrooms, offering companies a complete 360° service.

Accompanied by our trained technical staff, you can get your questions answered and gain insights into product functionality, receiving recommendations for immediate implementation.

BENEFITS

- Convenient on-site product demonstrations at your company premises.
- Thoughtful evaluation of solutions, resulting in time and travel cost savings.
- The opportunity for hands-on interaction with the instruments to understand their advantages.

The optimal solution comes directly to your company, providing a convenient and hassle-free choice.

FREE DEMO SERVICE FOR COMPANIES

Borin extends an invitation to companies, offering them the opportunity to examine machinery, equipment for industrial hygiene, and furnishings right on board the Borin DemoTruck®. This enables companies to comfortably evaluate these items before making a purchase decision.

Shelves to anchor railing with diameter 33,7/42,4 mm

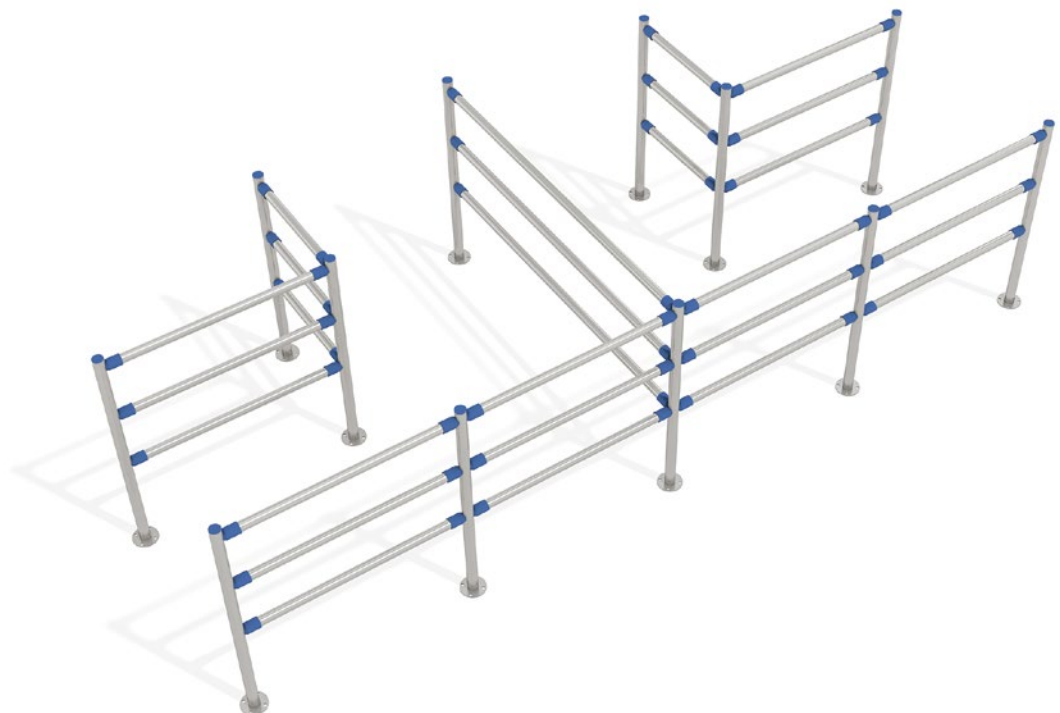

Supports in colour
code:

MODULAR BARRIERS

Tailored Stainless Steel barriers and railings

Maximum filtration. Air showers, against impurities.

These autonomous solutions are designed for maximum efficiency in eliminating contaminant particles from clothing and surfaces during the transition of personnel and goods between areas with varying contamination levels. They are also available in a water-based version with a disinfectant solution.

PEDESTRIAN AIR SHOWER

Side suction and blowing

Filtration efficiency: G4 + H14 - Filtered air jets: 25m/s

l 1.400 - w 1.200 - h 2.796 mm - 380 V

The nozzles, individually adjustable, are arranged on the ceiling and in the vertical corners, in such a way to always have trajectories that interfere with each other. Made with self-supporting double-walled panels in painted sheet metal or AISI 304 L stainless steel.

Silver decontaminating carpet version

Suction floor version

PASSBOX

Dry sanitization with UV lamp for decontamination including food products (the product can come into contact with the lamp)

Custom sizes

Maximum safety and efficiency.

Air knife curtains serve as a barrier against dust and insects, effectively preventing their entry into rooms. They enable targeted air conditioning, leading to significant energy savings.

The air curtains generate a flow which, when pushed downwards, creates a separation between the internal and external environment.

GREY BLADE

Pedestrian entrances

Air blade barrier with front suction panel in brushed aluminum, adjustable wings to direct the air jet, air suction grid and two tangential fans in thermoplastic resin.

WHITE BLADE

Pedestrian entrances

Air blade barrier with upper suction, centrifugal fan with speed controller available upon request. Ideal for internal pedestrian entrances of production areas.

VENTUS BLADE

Large entrances

Air blade barrier with front suction for big ranges, with centrifugal fan, ideal for large entrances of industries and warehouses. The airflow at static speed is adjusted by means of underlying wings.

PATENT PENDING

WAVE

Designed to be effective and easy to clean. Wave hello to a clean start.

The wave arrangement of the bristles ensures an efficient cleaning of soles and wheels, directing the dirt into the special collection slots. Its modular structure and convenient extraction keys make the Wave carpet very easy to dismantle and clean.

99,94%
EFFECTIVE

Reduction of bacterial loads.

WAVE CARPET

Sanitizing carpet for brushing and sanitizing soles and small or large wheels.

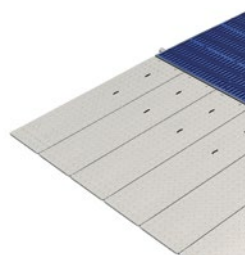

VERSIONS

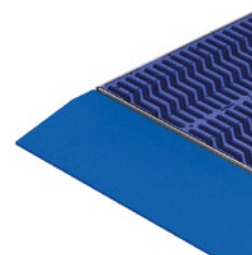

Wet recessed for pedestrian or trolley use

Dry recessed for pedestrian or trolley use

MODULES in blue POM C

BRISTLES in blue Nylon - Ø 0.5 mm

Silver

WITH TROLLEY

Highly effective bactericidal combo.

Decontaminant carpet designed for dry environments, equipped with silver ions and Biomaster coating. It possesses antistatic properties, offers a non-slip surface, and is easy to clean. The stainless steel plate on which the Silver carpet is mounted can be placed on the ground for pedestrian use or securely fixed to the floor using screws if it is intended for use with a trolley.

99,9%
EFFECTIVE

Reduction of bacterial loads.
Tested against E.Coli, Salmonella and MRSA.

SILVER PEDESTRIAN

With or without stainless steel plate. Silver ion carpet for dry environments on possible 304L stainless steel sheet support. Decontaminating, cleanable, antistatic coating.

STICKY WITH SHEETS

Sticky carpet with sheets, antistatic. It retains all types of bacterial particles, dust and residues from the soles.

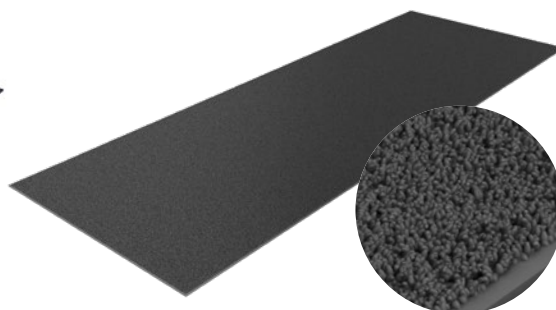

SANITIZING AND STEP DRYER

The Saniwork sponge ensures the action of the applied solution over time. The polyamide step dryer fleece is capable of drying soles.

DRY

Ideal for drying. The impacts and pressure resistant hot weave offers superior retention allowing dirt to filter into the carpet without remaining on the surface.

IMMERSION

Immersion sanitizing carpet. The rubber blends under the weight of the person and the sole is immersed in the disinfectant solution. Thousands of protuberances provide the immediate cleaning of soles.

MAGNETIC

Magnetic decontaminant carpet to access critical areas. It retains residuals, fragments, chips and metal scraps from soles or trolley wheels.

Multiuse columns

All products are also available in versions with photocell dispensers

Back pipe line and dropping lines

BACKPIPES AND DROPPING LINES

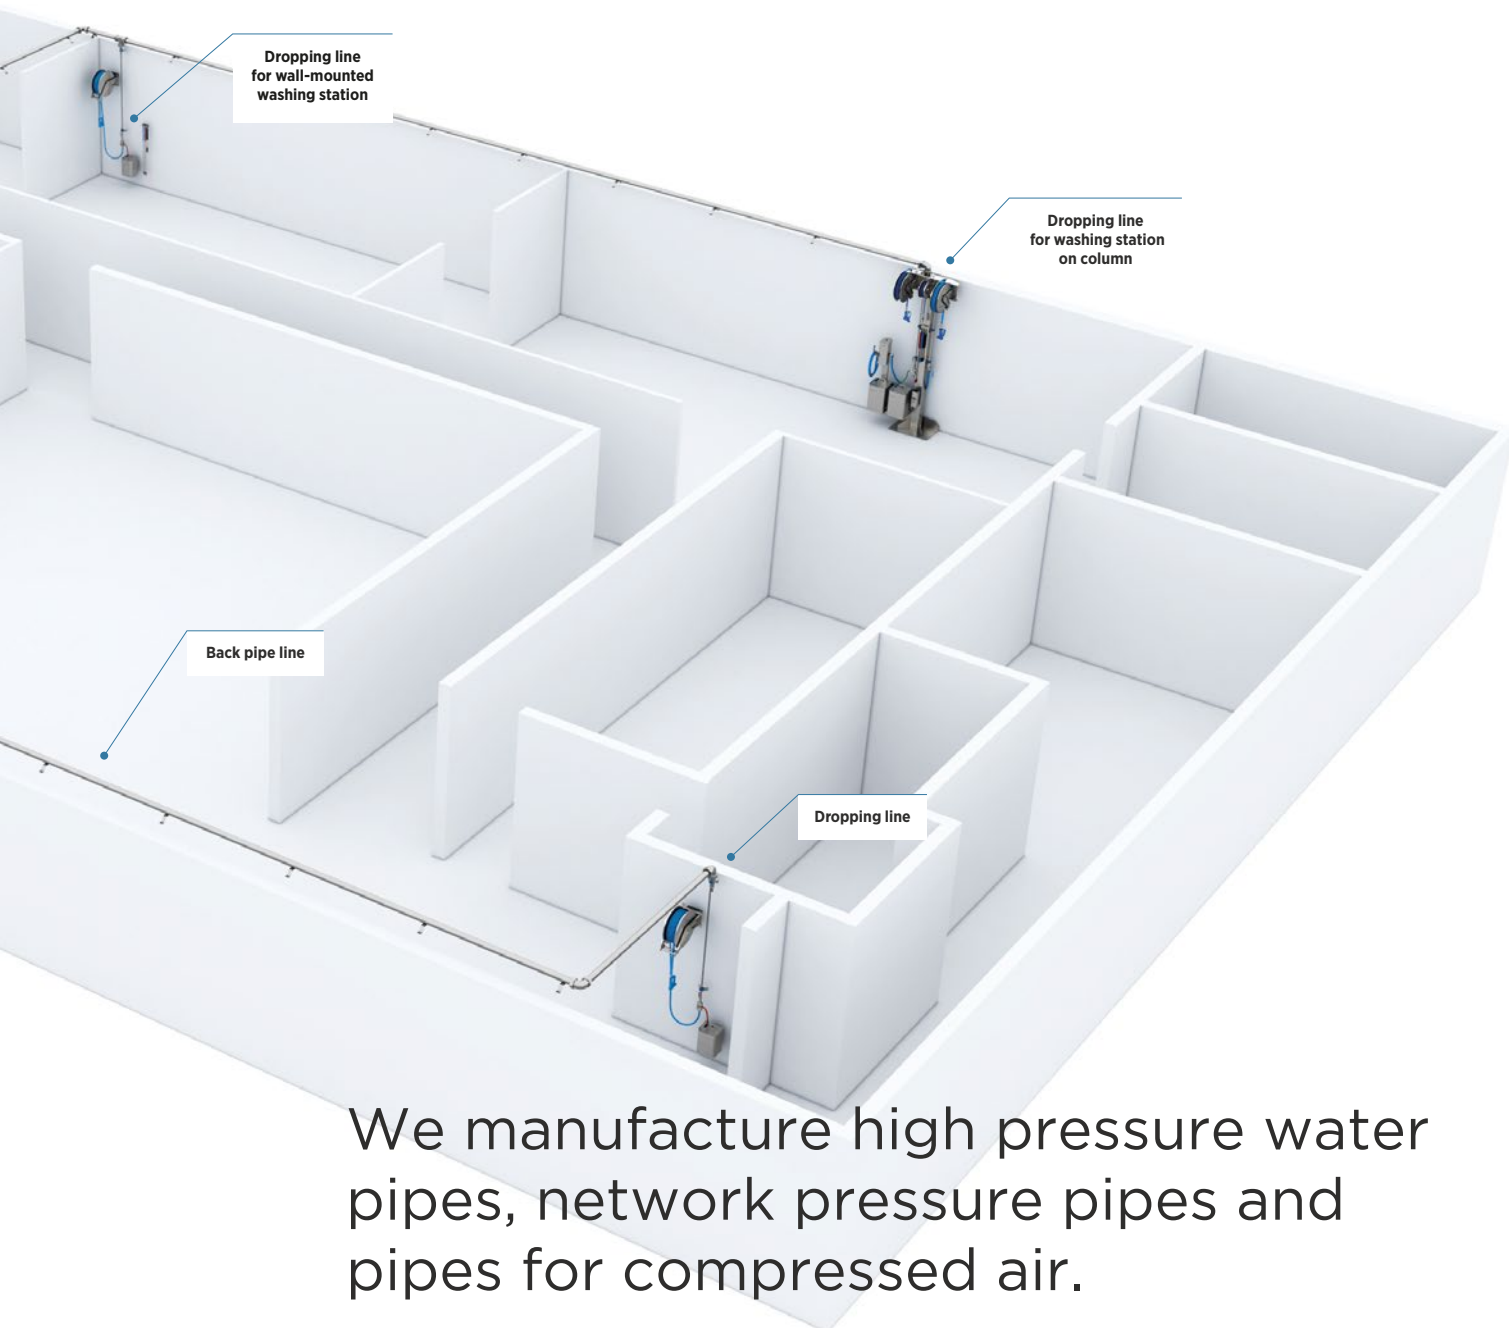

Wall washing station

Washing station on column

Mobile washing station

We manufacture high pressure water pipes, network pressure pipes and pipes for compressed air.

Constructed from either AISI 304L or AISI 316 stainless steel, these components guarantee the uniform distribution of water flow and pressure throughout the plant's internal and external departments.

The **BACK PIPE LINE** can be installed in plain view or concealed within a false ceiling, if one is present.

The **DROPPING LINE** supplies the washing stations in different departments. The flow rate and pressure are contingent on the chosen system type.

These pipes come fully equipped with fittings, collars, vibration-resistant pipelines, brackets, and bolts. The pipe can accommodate multiple independent dropping lines, the quantity dependent on the connected system's water flow rate.

KITECO

Washing station on trolley

Hygiene on the move. Mobile stations optimize efficiency.

Intentionally designed to maintain Production Departments free from permanent washing devices, this solution is outfitted with a certified and calibrated foam injector, rinse tank, hose reel, multi-pressure lances, and guns.

For instances where a centralized washing system is unavailable, it is also offered with a single pump onboard.

CLEANJET

Guaranteed effectiveness and savings.

The sanitization of conveyor belts is a crucial aspect of food safety and industrial cleaning. We provide an effective solution for automating foaming and washing, ensuring uniform cleaning of the surfaces, and ensuring significant time and cost savings. These systems are also mobile and easily adjustable, making them suitable for various types of conveyor belts.

Highly engineered foaming injector.

Constructed entirely from AISI 316L stainless steel, including a PEEK bypass for rinsing, our systems are available in two configurations: with compressed air (air) and without compressed air (no air).

These systems are designed to handle alkaline, acidic, chlorinated, and peroxide detergents and disinfectants without incurring internal corrosion, ensuring long-lasting durability. They are built to maintain the desired calibration settings over time.

The product percentage can be adjusted to ensure compliance with BRC and IFS certifications, with certified calibration adjustments ranging from 1% to 5%.

l 1.800 - w 500 - h 350 mm

MULTIFUNCTION MIRROR

600 - 800 mm - With integrated dispensers for soap, water and integrated hand dryer

Dyson Technology

We seamlessly incorporate Dyson hand dryers into our equipment, a brand renowned for innovation and quality. This partnership results in a flawless drying experience.

Dyson hand dryers hold global certifications for hygiene from HACCP International. Additionally, their HEPA filters effectively capture 99.95% of bacteria.

AIRBLADE V

Quick drying

Thanks to the redesigned motor and airflow, the Dyson Airblade V hand dryer is now quieter than ever while still managing to dry hands in just 12 seconds.

AIRBLADE 9KJ

It dries hands in just 10 seconds

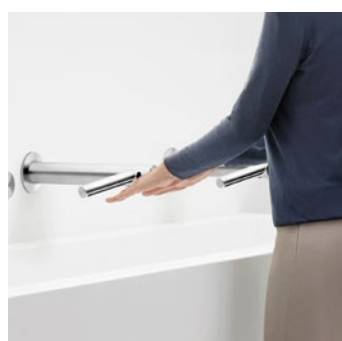

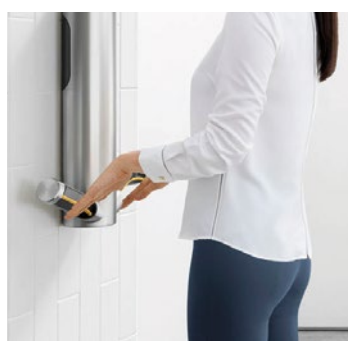

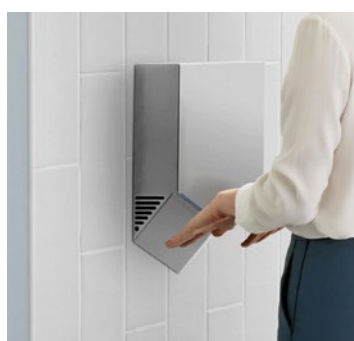

Two 0.45 mm curved slots create 624km/h air blades that follow the contours of your hands, removing more water in less time.

AIRBLADE WASH+DRY

Contactless without problems

It washes and dries your hands directly on the washbasin. The Dyson Airblade Wash+Dry automatically switches from water to air, so there's no need to touch dirty taps or buttons.

dyson BORIN - Authorized distributor in Italy

dyson airblade

Only a Dyson dries like a Dyson

Safe, hygienic and independently tested.
Contactless. HEPA filter. No paper waste.

Color coded cabinets and accessories

CUSTOMIZED CLEANING BOARDS

In different color codes

Cleaning board: the ideal solution for separating instruments between different Departments.

The cleaning board serves as the perfect solution for segregating instruments across various departments. These panels, known as Cleaning Boards, collect tools and accessories essential for cleaning and sanitizing different environments. They are color-coded based on the type of environment, effectively preventing cross-contamination.

Detectable equipment

Detectable tools, distinguishable by metal detectors and X-ray machines, are available in a color-coded system for easy identification.

Enhance hygiene and well-being by purifying the air, promoting a healthier lifestyle.

Utilizing a range of advanced technologies, we can effectively eradicate viruses, bacteria, allergens, fungi, molds, gases, volatile organic compounds, and unpleasant odors. Our devices do not rely on biocidal chemicals or potentially harmful light sources, making them safe for use around people and animals.

DEVELOPMENT

Continuous development is the driving force that steers humanity towards uncharted horizons. It encompasses a journey of growth, transformation, and advancement, propelling us to surmount limitations while adapting to the challenges that come our way. By wholeheartedly embracing knowledge, innovation, and the evolution of our capabilities, we construct bridges between the present and the future, revealing untapped opportunities.

Development thrives on the inquisitiveness, determination, and boldness of those who dare to imagine, innovate, and enhance.

It embodies a ceaseless aspiration to realize our fullest potential and leave an indelible mark on the world that surrounds us.
